She locked bim in and kept him till her husband and freaks came, when he was most gloriously whipped and his crew scattered.

The wind changes to the South, the direction of the waves is to the North, the water of the river flows out and is carried up to the pumps, holding a great quantity of blood and sewage in solution. This soup—it deserves the name —is forced into the reservoirs; and for a week, or until the wind; changes again, anathemas of the water, the Board of Public Works and the Common of the council, are the rule. This is a succession of linets that all of our readers must have observed. The remedy is, as we suggrest, in the adoption of some plan which will keep up a current in the river and a constant discharge of the water into the lake.

This seems to us so plain and self-evident that we can have but little regard for dear the lake.

of course, those who dispanily apply the term must be willing to accept the name to Bourbons, against whom the Jacobins contended, and whom they completely overthrew and destroyed. If we are to borrow party names from the French revolution, and the Unionists size to be called Jacobins, their opponents must don the vastly more discoputable componen of Bourbons, which is considerably worse even than Copperhe I. But the application of the name Jacobin to the Republican party, is not new. The Federalists tried it in Jefferson's and Madison Jacobins, and tried hard to fasten upon the old Democrate Republican party, founded by Jefferson, the name of Jacobins, but they fulled miserably in the at-

duty, and see to it that no negro is permitted to travel through Illinois, as a slave, even the efforts of the kidnspers will be defeated; and while Missouri preserves her labor, the South and the rebellion will lose their expected help. The order of which we speak is imperative. Traffic in negroes, and the making up of coffic-gangs by military connivance is stopped.

The President deserves the thanks of every true man for the promptness with which he has struck at the evil of which we complained; and now would be but follow up this action by cutting off the official heads of the commanders who have been consenting parties to this nefarious traffic, he would do well again. We commend him to the task, with the assurance that he ought to begin with the commander of the Department, Schofield himself?

There is a paper in New Ocleans—the True Delto—called conservative. It represents the copperheads as they are in that city, and goes as far in expressing their views as the military suthocities will allow. In an article which appeared on the 28th of October, the conservative editor mentions that he has heard of peace propositions likely to be adopted. They are, first: A suspension of arms for four months. Second, the suspension of negro entitatements and their immediate return to their maters, of all negroes not assessly sunsted. Third, the consolidation of the netional and role dobts. Fourth, the adoption of land and income taxes to pay the debts. And at length, the payment of slave owners, in Government bonds, for all loase of slave property, and also the payment of damages for all southern property inpured by melitery operation. On hear terms the Delta thinks the difficulties could be arranged until the Union restored. We should be glad set hard from the peace Democracy of the North, whether this pro-
